

# WOORIMIL, ECO-FRIENDLY FOOD CORPORATION

In 1989, Woorimil began with the devotion of the people to save our wheat seeds that were losing their presence. Now, we are in pursuit of producing healthy and safe food by harnessing domestic produce as the raw and sub material and are leading alternative food culture against harmful synthetic additives in food.

## INTRODUCTION OF WOORIMIL

In the fall of 1989 when Korean agriculture was declining, 180,000 people joined forces to revive production and consumption of Korean wheat and to safeguard agricultural food sovereignty.

To this, “the Headquarters of Revive Korean Wheat Movement” was founded with the mission of producing quality wheat by concluding contract cultivation with farmers, focusing on tireless R&D and offering fresh produce to customers, then sharing borne profits with farmers to take a lead in cultivating an eco-friendly food industry.

Even now, in thirty years since establishment, the mission has set a direction in which Woorimil moves forward.

- A reliable company that fills the dining table with authentic and safe food
- A company that cares for agriculture and farmers in pursuit of mutual benefit
- A green company that preserves the green ecological environment
- A responsible company that infuses the national economy and local communities with vitality

—

The birth of Woorimil originated in 1989 when 180,000 nationals devoted themselves in protecting domestically grown produce that was gradually losing its ground.

## — INTRODUCTION OF WOORIMIL BUSINESS

We create a healthy ecosystem by growing quality Korean produce, developing it into products for consumers, and sharing the generated profits with farmers.

Woorimil Co., Ltd makes four promises in pursuit of providing authentic Korean food.

### We only deal with authentic and reliable Korean produce

Produce domestically sown and grown in Korean fields is developed into quality products.

### We do not treat harmful additives

We refuse to use additives that manipulate and cover the original savors of Korean produce.

### Manufacturing facilities strictly observe sanitary and hygienic measures

Since a decent facility and environment ensures producing high-quality products, we exclusively manufacture products at clean facilities certified by HACCP & ISO22000.

### We care for the environment and farming areas

We assist wheat-growing farmers with becoming economically self-sufficient through crop purchasing and hold responsibility for distribution to building a sound and healthy ecosystem for Korean produce.
